

GERMAINE DE CAPUCCINI

# PERFECT FORMS SHOW YOUR FEET

With the SHOW YOUR FEET pack having feet in perfect condition no longer is a nightmare. You will enjoy carrying out this ritual at home to show off silky feet, cared for and perfectly hydrated.

# In just three steps:

## 1st step

### EXPERT SOCKS

Exfoliating socks for feet **NEW!**

These socks, with enzymatic action, smooth and hydrate the skin of the feet with roughness and hardness. They reduce the thickening of the skin of the feet, softening it and facilitating its later elimination. A perfect first step.

They are formed by two layers:

- **External plasticised layer:**  
Allows to create a closed environment at a stable temperature that favours the rapid penetration of the ingredients and retains the formula, allowing for a uniform application on the whole of the foot's surface.
- **Soft tissue internal layer:**  
Soaked in the active exfoliating solution, it remains in direct contact with the skin of the feet. Effective ingredients to finish with the most stubborn hyperkeratosis and accelerate the repair process of the skin.

Formulated based on alpha and beta-hydroxy acids with great keratolytic and exfoliating power:

#### Glycolic Acid

- Penetrates the skin faster at deeper layers because of its small molecular size.
- Reduces the cohesion of the corneocytes and consequently accelerates the natural process of exfoliation and the thickness of the stratum corneum is reduced.
- Increases the amount of retained water and the level of hydration of the skin is normalised.

#### Lactic Acid

- A unique AHA due to its double function: exfoliating and hydrating.
- Of the most used because of its capacity to increase the firmness, hydration and cellular renewal.

#### Salicylic Acid

- A beta-hydroxi acid that works on the most superficial layers, facilitating the mechanical elimination of the compacted skin cells.
- Its keratolytic power softens hardness and callouses.

#### Presentation:

- Individual: 4 units in a same sachet.
- Two treatments, two occasions. We recommend you use EXPERT SOCKS every 2 weeks.
- Each sock soaked in 20 g of liquid gel.
- A single application. Throw away after using it.

#### Characteristics:

Practical: put one sock on each foot and adjust the enclosed adhesive to the ankle.

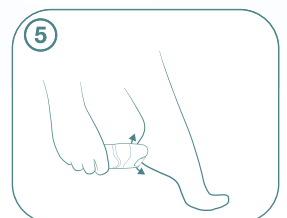

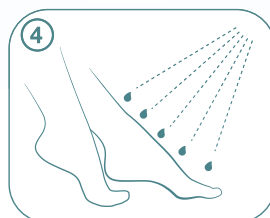

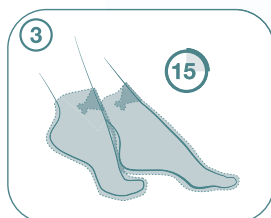

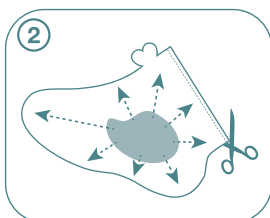

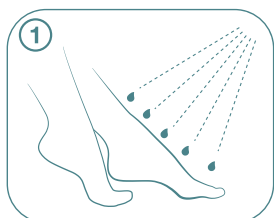

Fast: it is kept in contact with the skin for just 15'.

Clean: easily removed with lukewarm water or a wet towel.

#### Instructions for use:

1. The feet must be clean before using the socks.
2. Take the pair of socks out of the sachet and massage them with both hands until uniformly spreading the product.
3. Cut the top part and put them on both feet, adjusting them with the adhesive.
4. After 15' remove the socks, eliminate excess product with lukewarm water and carefully dry the feet.
5. MAGNIFEET.

## 2nd step

### MAGNIFEET

Anti-Roughness Electric File **NEW!**
