*Launching promotion:*

**GERMAINE DE CAPUCCINI**  
**TIMEXPERT SRNS**  
**PRO 60+**

EXTRA-NOURISHING HIGHLY DEMANDING CREAM

*"Proud of the history of my skin"*

COSMETIC ADVANCE  
based on  
epigenetics

*Your face has an incredible history*

Facial skin is part of your essence, of your memory. Each wrinkle, each sign of ageing reveals a story that defines you and makes you unique.

*Beauty is not a matter of age, but of attitude*

## PRO 60+

**A new twist in favour of natural beauty in full maturity.**

**PRO 60+** is the new sub-line of **Timexpert SRNS** aimed at women who, full of vitality, claim maturity as the best stage of their life. Real women who are not afraid to age and that show with pride their "good signs of ageing".

### *The "Sexygenarians"*

The unstoppable growth of the senior market, the image worship and the welfare society have caused the rise of this new trend called by the **American V Magazine** "**Sexygenarians**": **Women over 60**, sublime, sexy, who bet on true beauty and who **feel too young to feel old**.

*The richness of its texture, of velvety and evanescent touch, envelops the skin, nourishing it intensely.*

### EXTRA-NOURISHING HIGHLY DEMANDING CREAM

*The best destiny for the future of your skin*

Multiple actions for the most demanding skin

A sublime cream with a rich and silky texture that offers an intensive response to the **5 challenges** of ageing in full maturity:

- **Skin dryness and lack of comfort**
- **Incapacity of defence and regeneration**
- **Flaccidity**
- **Lines and wrinkles**
- **Darkspots and dull skin**

### INNOVATION

COSMETIC ADVANCE  
based on  
**epigenetics**

#### Unique anti-ageing action based on the latest hit in cosmetics: the science of epigenetics.

Today we know that the environment, the lifestyle, the emotions, etc. generate epigenetic factors that have a greater influence on how we age than the genetic inheritance itself. These factors mark our ageing route defining the "**history of our skin**".

The latest discoveries reveal that epigenetic alterations that affect the expression of our genes are **controllable and thus reversible**.

The **EXTRA-NOURISHING HIGHLY DEMANDING CREAM** includes an avantgarde ingredient, Epigenol, capable of dynamising the key mechanisms of youthfulness. It works like a true "switch" that turns "ON" the genes "turned off" by epigenetic factors. The generation of "youthfulness proteins" is reactivated, globally reversing the signs of ageing.

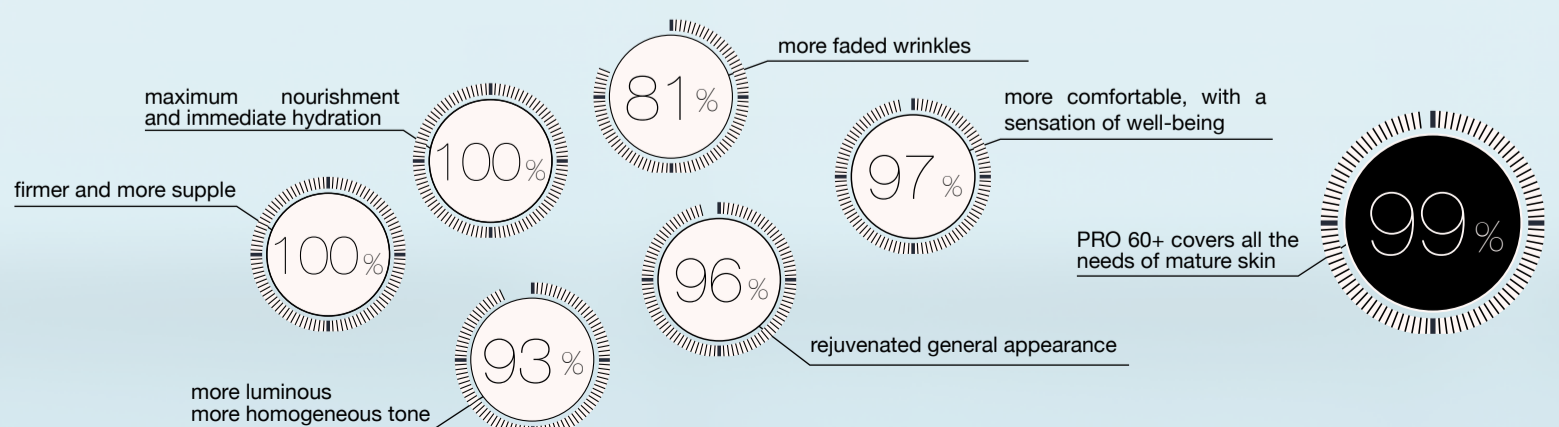

**Epigenol intervenes in the history of the skin to change its destiny.**

#### A powerful cocktail of ingredients capable of successfully facing the **5 CHALLENGES OF AGE:**

- 1 Provides dry, tight skin with comfort and hydration for skin that is more supple, firm and deeply nourished. *Hyaluronic Acid with high molecular weight, Multi-lamellar Complex of Ceramides, Cholesterol and Sphingosines.*
- 2 Protects and strengthens the skin against environmental aggression. Defence and repair of DNA. *RC-Advanced.*
- 3 Stimulates the group of skin regeneration processes to recover firmness, delay sagging and preserve the facial oval. *Biologically active cytokines.*
- 4 Smooths the skin's micro-relief, increasing skin suppleness and tone and softening lines and wrinkles. *Epigenol.*
- 5 Provides luminosity and a healthy appearance while correcting and minimising pigmentation darkspots. *Milk proteins.*

### RESULTS SELF-EVALUATION TEST

During only one month of application\*:

\* Self-evaluation test carried out on 69 women aged between 60 and 84.
